Dichotomous Key-Classifying Aliens

Dichotomous keys are based on the use of pairs of contrasting statements. That is, the pairs of statements are designed so that if a characteristic isn't described by one statement, it must be included in the contrasting statement. By setting up pairs of contrasting statements, you can set up a working key that leads the user to the correct identification. For example statement if 1a may be Alien does not have feet, then statement 1b would be Alien does have feet.
