Global Brain is more than just a brilliantly original contribution to the ongoing debate on the inner workings of evolution. It is a "grand vision," says the eminent evolutionary biologist David Sloan Wilson, a work that transforms our very view of who we are and why.

GLOBAL BRAIN by Howard Bloom | Kirkus Reviews

The global brain is a neuroscience-inspired and futurological vision of the planetary information and communications technology network that interconnects all humans and their technological artifacts. As this network stores ever more information, takes over ever more functions of coordination and communication from traditional organizations, and becomes increasingly intelligent, it increasingly plays the role of a brain for the planet Earth.

Howard Bloom steps into this void with Global Brain: The Evolution of Mass Mind from the Big Bang to the 21st Century. This book combines a discussion of group selection with a whirlwind tour of 3.5 billion years of organic history to advance Bloom's theory that each individual is merely a hypothesis, an idea formed by a "global brain."

Global Brain: The Evolution of Mass Mind from the Big Bang ...

Bloom (The Lucifer Principle, 1995) begins by proclaiming that a networked global brain has existed for over three billion years. Dismissing the proponents of individual selection as “blind keepers of an outworn scientific creed,” he proceeds to make the case for group selection. The case requires a considerable leap of faith.
