The D800's video system is very capable, offering both automatic and manual exposure control, single and full-time autofocus, audio levels control, internal and external microphone support, audio...

Using the Bulb setting in Manual mode

I've come across two Nikon manual lenses. One is a Nikon 28mm f/3.5 AI and the other is a Nikon 135mm f/3.5 AI. I would like to use them on a D800. I read the instructions and just to confirm, all I have to do is set the camera to manual focus, and then go to the menu to add them as "Non CPU Lenses", configure the focal length and aperture.

Long Time-Exposures (M Mode Only)

Press the release mode dial lock release and turn the release mode dial to E. Frame the photograph and focus. In single-servo AF (0 Autofocus Mode), photographs can only be taken if the in-focus (I) indicator appears in the viewfinder.

Self-Timer Mode

You choose both the aperture and the shutter speed. Manual mode even offers a shutter speed of "bulb" for long exposures. Because you control both aperture and shutter speed, manual mode offers great scope for expression. But choose the wrong combination and your photo will be too bright or too dark, or in other words over- or under-exposed.

Recommended Nikon D810 Settings - Photography Life

Press the I button and rotate the main command dial until M is displayed in the control panel. Choose a shutter speed. While the exposure meters are on, rotate the main command dial to choose a shutter speed of Bulb (A) or Time (%). The exposure indicators do not appear when Bulb (A) or Time (%) is selected.
