Quiz & Worksheet - Finding the Area of Parallelograms ...

Figure 1 A parallelogram with base and height labeled.. Finding the perimeter. The following formula is now apparent. Finding the Area. In Figure , also notice that $\triangle WXV \cong \triangle TYZ$, which means that they also have equal areas. This makes the area of $WXVT$ the same as the area of $XYZV$. But a rectangle $XYZV = bh$, so a parallelogram $XYTW = bh$. That is, the area

Worksheets

Parallelogram. In a parallelogram, opposing sides are parallel and equal in length. Opposing angles are equal but not necessarily 90° . The area, A , of a parallelogram can be found using the equation $A = b \cdot h$. In this case, b stands for the base of the parallelogram and h stands for the height.

Lesson 11-1

The formula for the area of a parallelogram is $\text{Area} = \text{base} \times \text{height}$ or $A = bh$. So this parallelogram has an area of 21 ft^2 , since $21 = 3 \cdot 7$. Only the base and the height are needed. Here, the 5.8 for the diagonal side is not part of the formula. Calculate the area of this parallelogram. Answer IXL Area of Parallelograms Khan Academy Section 10.3 ...
